#### Introduction

RGPS-3244GP-P is a rack mount Gigabit managed PoE Ethernet switch with 24x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X, SFP socket. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection), O-Chain and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology. RGPS-3244GP-P also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. It is specifically designed for the toughest industrial environments. In addition, the wide operating temperature range from -40°C to 75°C can satisfy most of operating environment.
